---

Hey, would someone like to attend this one for us on Wed at 10 (Could conflict with CAB if it goes full time)?

Long story short, Business is considering using ID.me for some customer validation. I believe it is a service, so not something we would need servers for, etc... But possible some firewall/proxy configs (tho if it is a cloud server, probably not even that...).

I think the bigger lift would be if it is something that they want integrated application wise into their workflow, so it might be an AppDev concern there??? (They are invited already)

Thanx for looking. ;-)

Just an FYI this was not spam or phishing. This is for a technical demo of the ID.me platform.
