## Foreclosure and Economic Recovery – Case Tracking System

This document provides guidance on procedures to be used when completing the Foreclosure and Economic Recovery – Case Reporting System (FERCTS). For ease of use, this document is divided into three (3) major sections: 1) Instructions for use, 2) Definitions, and 3) Instructions for reporting to the OSCA.

FERCTS is an Excel based case tracking system that is intended to capture essential case activity data over the life of the initiative. The FERCTS provides one workbook for each county in a circuit. The workbooks have been preloaded with a list of non-disposed and reopened cases for a specific county. This list was provided by the Clerk of Courts and includes all non-disposed, reopened and pending cases outstanding as of close of business June 30, 2010. New cases, filed or reopened after June 30, 2010, that are transferred to the initiative will need to be entered into the tracking application by court administration staff either individually or in bulk.

**WARNING!** To provide maximum flexibility for all jurisdictions, this Excel application is provided with basic capabilities only. It is not provided as a case management tool.

Please keep in mind that it is an Excel application.  
**Save your work! And save often!**

### 1. INSTRUCTIONS FOR USE

#### General

FERCTS is an Excel based case tracking system that is intended to capture certain essential case activity data over the life of the initiative. FERCTS is not intended to provide case management capabilities. Nor is it intended to capture every event, reopen or status change in the life of the case. Instead, this application will provide a mechanism to capture and report, to the OSCA, specific and limited case information. This information will then be used as part of the final report to the Legislature describing the outcomes of the Foreclosure and Economic Recovery Initiative.

The TCBC has directed that each circuit be given the maximum latitude possible in accomplishing the goals of this Initiative. Consequently, the FERCTS was designed to provide basic data reporting capabilities as part of a programmed application while making available the full data management capabilities inherent in Excel. The application provides basic data entry and search capabilities. More advanced data manipulation should be accomplished through Excel search, sort and filter functions.

#### Installation

The case tracking application is almost entirely driven by macro computer code written specifically for this initiative. Most Microsoft Office installations are installed with a high level of security set by default which prevents most macros from running correctly. To ensure that macros can run for this workbook, there are a few installation steps you must take before you open the workbook. Please see the separate FERCTS Installation Guide for detailed installation instructions.

**If the installation was successful, the user should see the following case tracking screen after opening the workbook:**

## 2. DEFINITIONS

Definitions for this initiative come primarily from the Summary Reporting System Manual (January 2002) with the exception of Case Status and Date Reopen Closed.

For purposes of this initiative, case status captures information on the state of a case as it relates to judicial activity and date reopen closed captures the date that a previously reopened case was closed.

Definitions for these fields are provided below.

- Circuit
- County
- Uniform Case Number – full 20 character UCN as defined by the Supreme Court
- Filing Date – initial document stamp date per the SRS Manual
- SRS Case Category – ‘Real Property/Mortgage Foreclosure’
- Date of Case Status Change – captures the date case status changed from one category to another.
- Current Case Status – captures information on the state of a case as it relates to judicial activity. Over broad categories, it identifies whether the court is actively working to resolve a case or whether the judicial action cannot be concluded due to extenuating circumstances.
  - Active
  - Stayed – Bankruptcy
  - Stayed - Pending resolution of another case
  - Stayed - by Agreement of the parties
  - Stayed - Appeal pending
  - Inactivity - Attorney inactivity
  - Inactivity - Insufficient pleadings or documentation
  - Inactivity - Mediation/Settlement negotiations
  - Inactivity - Other (see Case Comments). Please include a brief description of the reason in the case comments field of the record. In particular, if the case is inactive due to loss mitigation review, please add the notation “loss mitigation review” to the case comments
- Date of Disposition – Per the SRS Manual, report cases as disposed after the final judicial decision which terminates a civil proceeding by a summary/final judgment or ordered entered by the court.
- Disposition Type – Summary/Final Judgment, Trial, and Dismissed
- Date of Reopen Event – Report the date that a post-judgment motion is filed and the \$50 fee is paid.
- Date Reopen Event Closed – Report the date on which the reopened case is closed after the motion which reopened the case has been resolved by judicial decision/order which completes court proceedings on the issue raised by the motion (ex. Motion to reschedule foreclosure sale, Order rescheduling sale)

### 3. INSTRUCTIONS FOR REPORTING TO OSCA

These instructions establish the reporting standards to be followed when entering and submitting FERCTS information. The FERCTS workbook encapsulates all real property/mortgage foreclosure cases that are non-disposed or reopened (i.e. pending) as of June 30, 2010. The data from this tracking system will be used to provide the Supreme Court with information on the number of dispositions, average age and clearance rate of backlogged real property/mortgage foreclosure cases. Trial court administrators are to submit a copy of the tracking system workbook on a monthly basis to the Office of the State Courts Administrator (OSCA.) OSCA is to receive the copy no more than the 10<sup>th</sup> of the month following the end of the monthly period.

Following are the procedures to use when submitting a copy of the tracking system workbook to the OSCA.

- ✓ This workbook is almost entirely macro driven. Most Microsoft Office installations are installed with a high level of security set by default. To ensure that macros can run for this workbook, there are a few installation steps you must take before you open the workbook. Please see the separate FERCTS Installation Guide for installation instructions.
- ✓ The first transmission of the FERCTS workbook should include updates through July 30, 2010.
- ✓ A copy of the FERCTS workbook must be submitted to the OSCA by the 10<sup>th</sup> of the month following the end of the month being reported. For example, a copy of the workbook updating information through July 30, 2010 is to be sent to the OSCA by August 10, 2010.
- ✓ The workbook copy must be submitted via e-mail to [FERCTS@flcourts.org](mailto:FERCTS@flcourts.org). When submitting, the e-mail, the subject line must contain the following words: “foreclosure and economic recovery” and the date the workbook is submitted for. For example, a workbook submitted on August 9, 2010 for the July 2010 period would contain the subject line “Foreclosure and Economic Recovery Report – 2010/07”.
- ✓ The workbook must be submitted in the Excel form provided by the OSCA. To ensure proper operation of the application, the file name is fixed as circuit number, underscore followed by county number and name ending with FERCTS.xls. An example file name is 01\_17Escambia\_FERCTS.XLS.
- ✓ Once the trial court administrators submit a report to OSCA, an error check process will be performed by the OSCA. If reporting errors are identified, the circuit will be notified and errors must be corrected. Corrections will be verified on the next monthly submission.

**CAUTION**

If you do not see the above user form, see only the underlying spreadsheet or receive an error message, please contact Court Services, PJ Stockdale, 850-410-1523, [stockdap@flcourts.org](mailto:stockdap@flcourts.org) for assistance.

**Workbooks**

The FERCTS provides one workbook for each county in a circuit. The workbooks have been preloaded with a list of non-disposed and reopened cases for a specific county. This list was provided by the Clerk of Courts and includes all non-disposed, reopened and pending cases outstanding as of close of business June 30, 2010. New cases, filed or reopened after June 30, 2010, that are transferred to the initiative will need to be entered into the tracking application by court administration staff either individually or in bulk.

To accommodate all jurisdictions and users, workbook compatibility has been set to Excel 2003. However, this limits the number of cases that can be recorded in any one workbook to approximately 65,000. For the larger circuits, workbooks can be split into county and year (e.g. 11\_13MiamiDade\_CY2009\_FERCTS.xls). If a jurisdiction has Excel 2007 available, the workbook can be converted to Excel 2007 format with the increased capabilities associated with that format. Please contact PJ Stockdale (850-410-1523, [stockdap@flcourts.org](mailto:stockdap@flcourts.org)) for assistance.

Unfortunately, Excel does not have multi-user capabilities in any version. This means that a single workbook cannot be updated by two different persons at the same time. However, it is possible to make copies of the workbooks for different individuals. If multiple persons will be performing data entry, it is recommended that the workbooks be divided into calendar years or case number blocks for each individual so that each case appears in only one workbook. This practice will reduce duplication of effort and will greatly simplify updating. We ask that you save these workbooks using a standard naming format. Some examples of workbook names are

01\_17Escambia\_0001-4999\_FERCTS.xls  
01\_17Escambia\_5000-9999\_FERCTS.xls  
01\_17Escambia\_CY2009\_FERCTS.xls

**WARNING**

To provide maximum flexibility for all jurisdictions, this Excel application is provided with basic capabilities. It is not provided as case management tool.

**NOTE**

To ensure the SAVE feature of the workbook is operational, please be sure to enter the exact, full name of the workbook in the App Workbook cell of the TABLES worksheet. (cell reference TABLES!B7)

Please contact PJ Stockdale (850-410-1523, [stockdap@flcourts.org](mailto:stockdap@flcourts.org)) for assistance

If you choose to bulk load data directly into the spreadsheet, it is imperative that the user use the SRS case category, case disposition category and the Type of Event category exactly as they are listed on the worksheet Tables for SRS Case Category (column D), Case Disposition (column E) and Type of Status (Column F). If these values are not entered exactly, the data entry user form will not recognize the value and will not display the record on the form. Additionally, these case records will be not be considered valid when the data is sent to the OSCA as they cannot be cross referenced to one of these categories.

**CAUTION**

Please keep in mind that it is an Excel application.

**Save your work! And save often!**

**Data Entry Screen**

The application provides a one page data entry and display user form with a second search tab. New cases can be added through the main user form or directly into the spreadsheet. The underlying Excel spreadsheet does allow for basic bulk loading of data to make this task easier for larger circuits. However, care must be taken to ensure the correct format and field order is maintained. Please see the Definitions section for a more detailed description of these fields.

<p>Record 24 of 12264</p> <p><input type="button" value="Save FERCTS"/> <input type="button" value="Close FERCTS"/></p>	

**NOTE:**

All pre-loaded backlogged cases assigned to this initiative have been assigned a default status of "Inactivity - Other". Please ensure that this status is changed to "Active" when either the judicial officer or support staff begins work on the case.

### How to update a case record

The FERCTS is designed to capture essential case activity data. Consequently, it will be necessary for staff to update case records. For example, assume that the court is ready to take action on the case represented by the data entry screen above.

- The first action required is to reset the case status from “Inactive – Other” to “Active”. Since it is unlikely that every record to be updated will be the first record in the spreadsheet, the user will need to search for the record by UCN. See the section [How to search for a record](#) for more information on searching.

Record 31 of 12264 Save FERCTS Close FERCTS

Additional status changes may occur as this action proceeds and staff should update the status as required.

- When a case is finally disposed for judicial action whether by disposition or resolution of a post-judgment action (see [Definitions](#)), the user should enter the date of the disposition along with the appropriate disposition type. Please note that for a post-judgment case, the user need only supply the date of re-opening or of closing. The “Case Closed for Court Action” checkbox and the “Date Case Closed” fields will be completed automatically whenever a valid disposition date or a valid post-judgment closed date is entered.
- To reduce the amount of data entry, the case status may be left as “Active” since it is redundant to require a status change of “Disposed”

### How to search for a record

The tracking application provides basic search capabilities via the Search tab. Since the user has ready access to the full searching capabilities of Excel, the search function provides search capability on the three fields determined most useful during field tests; 1) Uniform case number, 2) Case status and 3) Case age. For this

initiative, case age is calculated to be the number of days from filing to the current date or from the reopen date (whichever is later) to current date.

The application search function will then allow the user to move through all of items meeting the search criteria using the "Find Next" and "Find Previous" buttons. The search function allows wildcards so that more than one case can be identified such as all cases with a UCN in 2008 (172008\*) or with a case age greater than 180 days (>180). Please use the "Tips" button located on the Search tab for additional information on using wildcards.

**TIP:**

For more advanced data manipulation, please use the inherent processing capabilities of Excel. The user form may be closed by clicking on the red X in the top right corner of the form. The user form may be reactivated by pressing the shortcut key, CTRL-m, or from the menu by clicking the Developer option, then selecting Macros. Select the ShowDataForm macro and click the "run" button. The initial splash screen will not display but after a few moments, the user form will appear.

### **How to exclude case records**

Due to limitations in some Clerk of Court systems, the initial set of cases pre-loaded into these workbooks may include cases that are not appropriate candidates for this initiative. The FERCTS provides an "Exclude" button on in the bottom right corner of the data entry screen which will allow the user to mark these record as ineligible. The record will not be deleted from the spreadsheet but will appear as grayed out on the data entry form.

### **How to add a new case record**

New records may be added by clicking on the "Add" button. This will place the application in insert mode which will blank the data entry screen and will position the cursor on the first blank row at the end of the spreadsheet that is visible behind the data entry form. The user must enter, at a minimum, a Uniform Case Number, filing date and case status. The application will enter the SRS case type automatically. When initially entering a case into the tracking system, please assign the appropriate case status from the list provided.

Once the appropriate data is entered, the user must click the "Update" button to commit the record to the spreadsheet. Most buttons will not work in insert mode. To cancel the new record, click the "Cancel New" button. This will delete the new data and return the cursor to the record that was active before the "New" button was selected. Clicking the "New" button while in insert mode will save the current record and advance the cursor to the next blank record.

The Search and the Insert modes are complimentary in that the user can enter insert mode while search criteria are active. However, the reverse is not true; the user cannot enter search mode while in insert mode.

### How to save your work

There are three methods for saving a FERCTS workbook: 1) Click on the “Save FERCTS” on the data entry screen. This will save the workbook and return the user to the data entry screen. 2) Click on the “Close FERCTS” button on the data entry screen. This will save and close the FERCTS workbook. It will not affect other Excel workbooks that may be open. 3) use the SAVE (CTRL-S) option from Excel

**CAUTION**

Please keep in mind that it is an Excel application.

**Save your work! And save often!**

### Automatic Validity Checks

The FERCTS will perform a variety of data entry validity checks both when the data is entered and when an update is applied. Certain fields such as the UCN and date fields are checked for validity as the data is entered. The user will not be able to advance until the errors are corrected. In the case of a new record, all date errors must be corrected before the "Update" (add record) or "Cancel New" button will work. In addition to field level checks, the entire record is also checked for consistency before it is committed to the spreadsheet. At this stage, the FERCTS will check that the case record is consistent by looking at each field and ensuring that together, the information makes sense. For example, the application will check that a valid disposition category is associated with a valid disposition date.

**WARNING:**

**Please take care if you are bulk loading data directly into the underlying spreadsheet.**

It is possible to enter invalid data when entering bulk data directly into the spreadsheet (for example entering a UCN without a filing date). These records will be displayed by the data entry form. However, the application will not allow the user to leave the record until the errors are corrected. A large number of erroneous records could significantly reduce the usability of the FERCTS.

### Notes on Specific Data Fields

#### Case Status:

Case Status captures information on the state of a case as it relates to judicial activity. Status is subdivided into three broad categories which identify whether the court is actively working to resolve a case or whether the case cannot be concluded due to extenuating circumstances and just what those circumstances are. The primary purpose of the tracking application is to identify why cases are not moving through the system

All cases transferred into the initiative have been assigned a default status of “Inactivity – Other (see Case Comments)”. When there is activity on these cases, please change the status from “Inactivity – Other” to “Active”.

**NOTE:**

When changing a case status to “Inactivity – Other”, please include a brief description of the reason in the case comments field of the record. In particular, if the case is inactive due to loss mitigation review, please add the notation “**loss mitigation review**” to the case comments. Comments are not required for those cases that were pre-loaded into these workbooks.

Case Closed For Court Action (checkbox and date):

These fields provide a convenient way of flagging a case record when no additional court action is required. They are set automatically when a case is disposed or when a reopened case is closed. Since it is not possible to predict all of the ways a case may move through the court system, the user may manually change the Date Case Closed for Court Action field or may override the status by un-checking the "Case Closed for Court Action" check box. If this box is unchecked, then the case will be considered to require additional court action before the case can be moved to sale so, please, be sure that action is required.

Date Reopen and Reopen Closed:

If the Reopen Date and the Reopen Closed date are both filled in, changing the Reopen date to a value that is greater than the current Reopen Closed date will cause the application to assume a new reopen action is pending. The application will blank out the Reopen Closed date and clear the "Case Closed for Court Action Status."
