Subject: Dual-band radio programming for Kenosha
Date: Friday, August 28, 2020 1:10:10 PM

Please share with any of our officers going to Kenosha. Don't release to the public.

I programmed the Dual-band handheld radios with a dynamic zone set up for Kenosha. The zone is called "LL Dynamic". Think of this dynamic zone like the presets on your car stereo. It's basically all the favorite channels in the radios, which are the ones in use for the incident. This will allow users to have everything they should need all in one zone.

Zone LL Dynamic

1. 8TACGOLD (Simplex channel used by WKPD. Limited range)
2. **VTAC36 (Command channel, patched to 8TAC92 below)**
3. **8TAC92 (Command Channel, patched with VTAC36 above)**
4. MARC 1 (Backup repeater being used for traffic control)
5. VLAW31 (Simplex being used for Armored Vehicles)
6. VTAC12DG (Used by COMLs)
7. WEMCAR (IMT and ICP coordination)
