Subject: Dual-Band Radios for Kenosha Event
Date: Tuesday, August 25, 2020 12:36:47 PM

Please continue to use the dual-band handheld radios for units responding to the Kenosha protests. The radios are the ones with the full number keypad, and are in the charger on top my fridge. Put them back on my desk or the chargers when done. We are currently using VTAC36 and MARC 1 which are VHF channels. The dual-radios will give us the best results until we get the patch working better tonight.

The MRAP and HUMMV also have these channels in their VHF mobile radios.
