Declaration of Marvin Lynn, Ph.D.

I, Marvin Lynn, pursuant to 28 U.S.C. § 1746, declare the following:

1. I am a Professor and former Dean of the College of Education at Portland State University in Oregon. I have worked in the field of education for nearly three decades and have conducted extensive research in education. Prior to working in higher education, I worked as an elementary school teacher in New York City and Chicago. For the last two decades, I have worked as a professor and full-time academic dean or associate dean in Colleges or Schools of Education in Indiana, Illinois, Wisconsin, Maryland, and Oregon. I have taught mainly graduate courses in multicultural education, urban education, elementary education, critical race theory, and African American education. I have attached a copy of my curriculum vitae that lays out my education, experience, and expertise.
2. I was asked to give my expert opinion and impressions regarding the benefits of certain teachings reflecting race, culture, and gender, as well as diversity and harassment training, and potential implications of Oklahoma’s House Bill 1775 on teaching, student learning and environment. In forming my opinions in this case, I rely on my experience and expertise, the research cited in this report, and the following documents reviewed: the complaint, client declarations, Oklahoma Academic Standards, House Bill 1775 and State Board implementing regulations.
3. My research has documented how teachers of color, particularly African American men, draw on their students’ culture to effectively teach in poor and working-class

urban public schools (Lynn, 1999, 2001, 2002, 2006a, 2006b), (Lynn & Jennings, 2009), and (Lynn, Johnson & Hassan, 1999). My scholarship has been situated squarely within the rich body of research that examines how teachers draw on students' cultural resources to promote academic success for students of color. Additional research (Ladson-Billings, 1995) and my own teaching experiences demonstrate how all students benefit from teaching practices that view students' culture and language as assets.

4. These approaches to teaching are referred to as “Resource Pedagogies” (Paris & Ball, 2009), (Paris, 2012), and (Reyes & Norman, 2021). Resource pedagogies, view students' culture and language as assets and not deficits (Reyes and Norman, 2021). Moreover, resource pedagogies “repositioned the linguistic, cultural, and literate practices of poor communities—particularly poor communities of color—as resources” (Paris, 2012).
5. Culturally responsive teaching, culturally relevant teaching, and culturally sustaining pedagogy are defined as Resource Pedagogies.
6. Culturally responsive teaching, “is defined as using the cultural characteristics, experiences, and perspectives of ethnically diverse students as conduits for teaching them more effectively” (Gay, 2002). Culturally responsive teachers situate learning within the realm of students' experiences as a way to make learning more personally meaningful. Academic outcomes for students of color, in particular, are increased (Gay, 2002).
7. Culturally relevant teaching focuses on ensuring that students of color achieve academic success, develop a deep appreciation for their own culture and history, learn to be concerned about issues of social inequality, and begin to see themselves as empowered citizens in a democracy with the responsibility to be engaged in community uplift and advancement (Ladson Billings, 1994, 1995a, 1995b).
8. There is an overwhelming amount of research that suggests that culturally responsive and culturally relevant teaching methods have a strong positive impact on student learning (Howard & Rodriguez-Minkoff, 2017) and (Byrd, 2016). In fact, Byrd (2016) conducted a student survey that included the perspectives of over 300 White, African American, Latinx, and Asian American students and found that the vast majority of these students believed culturally relevant instruction was important for their academic success.
9. Culturally sustaining pedagogy is an evolution of both of these areas of focus. It has been argued that too much emphasis is placed on teaching students of color to learn the language of the dominant culture (Paris, 2012). Teachers should have the freedom to do more than draw on student culture as a basis for making the

curriculum more responsive and/or relevant or as a way to teach students. Classrooms should be places where bilingualism and bi-culturalism are encouraged, promoted, and ultimately *sustained* (Paris, 2012).

10. Culturally sustaining pedagogy also seeks to challenge trans/homophobia and sexism in schools by recognizing racially and ethnically diverse students also are diverse in their sexual and gender identities (Paris & Alim, 2017). These identities are also sustained and not erased. As such, culturally sustaining pedagogies demand that both schools and classrooms shift their practices to suit the cultural and linguistic needs of their students.
11. Resource pedagogies demand that teachers shift from a deficit-based mindset about communities of students of color to an asset-based approach that values and honors students' culture and lived experiences. In order to do this, teachers must confront their own internalized racial, ethnic, gender, and social class biases and believe in their own ability to positively impact the achievement of all students (Lynn, et al., 2010).
12. There is a strong relationship between teacher quality and student achievement (Darling-Hammond, 2000), (Lynn, et al., 2010), and (Peske & Haycock, 2006). In fact, for students of color, who may not have access to a wealth of academic resources at home, good teachers are critically important for their academic success (Haycock, 2006).
13. Good teachers value their students' home cultures and lived experiences, possess a high degree of cultural competence, understand how to draw on resource pedagogies as a tool to advance academic achievement for all students, and have a high degree of self-efficacy (Lynn, et al., 2010). In fact, teachers' self-efficacy beliefs are a critical factor in shaping their ability to effectively teach African American, Latinx, and Indigenous students – especially those who may be experiencing poverty (Noguera, 2007). In other words, teachers must believe in their students' potential for success, if they are going to help their students to become academically successful. Successful teachers of students of color must overcome their own biases in order to effectively teach these students.
14. Resource pedagogies demand that teachers confront and transform their biases and embrace the culture and lived experiences of all students (Paris, 2012). This is an important precursor to academic success for populations that have historically experienced persistent school failure.
15. Given what we know about the important links between student success and teacher quality as determined by teachers' cultural competence, their ability to draw on student assets, and their self-efficacy beliefs – efforts to narrow the teacher education curriculum and limit teachers' opportunities to honestly address

issues of race and culture in the classroom will likely stifle teachers' creativity and severely limit their ability to teach diverse students effectively.

16. Since there is a strong link between culturally sustaining teaching practices and the academic success of students of color, efforts to curtail teachers' ability to use these practices will likely negatively impact the overall success of students of color.
17. This will also negatively impact our ability to diversify the teaching workforce. Students of color who express an interest in teaching do so because of their commitment to uplifting and advancing their own communities (Lynn, 2006). My own research has shown that teachers of color are motivated to teach because they see culturally sustaining teaching practices as one key way to support their students and thereby uplift their communities. If they are not able to use these approaches in the classroom, they are far less likely to see teaching as a viable professional opportunity worth pursuing.
18. Other research I've conducted has also shown that teacher education students generally have high expectations about developing the necessary skills to effectively teach students of color (Lynn & Smith-Maddox, 2007). They expect to learn to become social justice educators equipped with tools to advance high achievement for all students. If teacher education programs cannot offer the curriculum that would support teachers to become social justice educators, teacher education programs will face severe declines in enrollment. Ultimately, the teaching profession will face even greater shortages than those we are seeing now.
19. There is already strong evidence to suggest that "laws banning critical race theory are putting a chill on" teachers' ability to plan their lessons effectively (NPR, May 28, 2021). Critical race theory has been misconstrued broadly by conservative pundits who have purposefully attached the term to a whole range of ideas including culturally relevant teaching, culturally responsive teaching, patriarchy and other ideas and practices that have been commonplace in schools for decades (Wallace-Wells, 2021).
20. The aforementioned NPR article quotes an Oklahoma City teacher and school board chair who argue that the passage of state law banning discussions of race in schools has stifled instruction and made it difficult for teachers to determine how to approach challenging topics such as race – which are ever-present in our society. The article goes on to talk about how the law has created a climate of fear among teachers across the state and in other states where such laws have been passed. Kim (2021) refers to such laws as "an assault" on pedagogy and teachers' autonomy as education professionals.

21. The sworn declarations filed in this case also provide evidence that H.B. 1775 is chilling and censoring important teaching in classrooms. This “assault” on teaching, as referred to by Kim (2021), related to diversity, equity, and inclusion (“DEI”) has been harmful to African American students according to NAACP-Oklahoma. Parents comment that the lack of access to DEI courses and curriculum across the educational pipeline has directly harmed their students. One parent included in the NAACP’s declaration has noted how this has already led to the exclusion of books from the curriculum that have been written by African American authors. One of the students included (Student A.A.) expressed serious concerns about a lack of representation of authors of color in the curriculum. This student, who is White, expressed concerns about having a limited worldview based on the way the law has narrowed the curriculum.
22. Additional evidence provided in the declaration prepared by AIM leaders details a shocking history of racialized and cultural harassment of Native students in Oklahoma schools. Research supports their position that both Native and Non-Native students will benefit from information about the history of Native Americans and other communities of color in the state and in the nation – even if that history is difficult.
23. Similarly, the Killackey declaration offers a teacher’s perspective on how H.B. 1775 is negatively impacting teaching and learning. My review of the banned concepts reinforces his view that the law essentially forces teachers to “whitewash” the curriculum and forces them to offer a very limited and narrow curriculum. He addresses the potential harm that could befall him and other teachers who attempt to offer a more honest and inclusive curriculum. Teachers should never fear losing their jobs because of their commitment to providing all students with a broad, diverse, and inclusive curriculum.
24. Crawford’s declaration speaks to the confusion that many teachers are facing because of the vagueness of HB 1775. I agree that while the law seems to state that it will not prohibit teachers from implementing the state curriculum standards, the law, in many ways, stands in direct contradiction to the values espoused in the standards. Both Crawford and Killackey are teachers who use culturally relevant approaches to teaching. They should be rewarded for their commitment to student learning and to helping students to reach the standards, not threatened.
25. Finally, the student, S.L. rightly expresses concerns about being denied the opportunity to experience a culturally relevant classroom. It is clear that S.L. does not believe H.B. 1775 is in the best interest of her and her fellow students in their district. S.L.’s response is reasonable. Based on my experience as an educator and researcher, students of color like S.L. can benefit greatly from Resource Pedagogies as can other students. These benefits are at-risk under H.B. 1775.

26. As the vast majority of research has shown, learning experiences including courses, professional development, and training that focus on race, culture, gender, and human sexuality are positive or do not show harm to students or their teachers within K-12 schools or on college campuses (Denson & Bowman, 2017).
27. In addition, the legal constriction of opportunities for students and their teachers to learn about these important concepts has had a chilling effect on the profession of teaching across the educational pipeline. Teachers feel less certain about whether their efforts to teach an honest curriculum will cause harm or lead to significant student and parent complaints. As the declaration from the Oklahoma NAACP makes clear, there is a high level of fear and uncertainty in the environment.
28. As an administrator, I am also very concerned about the complaint process, as outlined. It places an undue burden on school administrators to sort through large volumes of paperwork that will unnecessarily distract educators and administrators from doing their most important work – teaching and managing schools.
29. H.B. 1775 does not appear to have any sound pedagogical basis and it negatively impacts educators’ ability to make independent decisions about what they will teach and how they will teach it. As noted in the declaration written by Crawford, the language is vague, unclear, and easily misunderstood. Additionally, as stated earlier, it directly contradicts the state standards. And as pointed out by both high school English teachers – Killackey and Crawford – the restrictions may undermine the State’s efforts to ensure Oklahoma’s students have the skill sets needed to be prepared for college.
30. This limits their autonomy and agency as educators who should be able to use their intellectual resources to construct relevant curriculum and teaching materials in their classrooms. In my view, this results in what Allan Bloom (1987) referred to as “the closing of the American mind” which is ultimately undemocratic. It is tantamount to the elimination of academic freedom and brings about a serious restriction of free speech and the free exchange of ideas and information that is critical to learning and building a true democracy.
31. According to the sworn declarations, this is happening now in schools across Oklahoma and it is harming students’ social, cognitive and emotional development. Based on my experience and expertise as an educator, researcher, and higher education faculty member and administrator, there is an imminent need to stop this harm now as the detrimental effects can be expected to compound overtime.
32. In my opinion, this will also lead to teacher shortages – across the board – which will ultimately result in a serious decline in student attainment and achievement across the pre-school through graduate school educational pipeline.

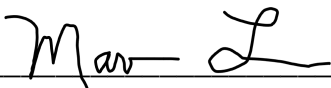

33. Some of the research on sexual harassment on college campuses has examined the relationship between sexual harassment training and workers' attitudes about issues of sexual harassment (Antecol and Cobb-Clark, 2003). According to Sandler (2007), such training does lead individuals to be more reflective about the types of workplace behaviors that can be construed as discriminatory or harassing. Based on Antecol and Cobb-Clark's research, one could reasonably infer that increased understanding about what constitutes sexual harassment and discrimination would lead students on college campuses to reflect more deeply about their behavior and how it contributes to the overall creation of environments that are safe for women and girls. The only way to ensure that this occurs is to require it of students and university personnel. This is also supported by my own experience as a university administrator where I have observed an overall reduction in the number of complaints from faculty, staff, and students about discrimination and harassment along the lines of race, gender, and sexuality once faculty and staff became more actively engaged in professional development designed to increase their knowledge about various forms of discrimination that exist and how to avoid it. While I observed that there were always individuals who were not comfortable participating in training on gender discrimination, they were less likely to engage in discriminatory behavior and practices. As a result, employee complaints regarding other employees ceased to exist.
34. There is some research which suggests that "diversity courses" on college campuses do lead students to have more positive attitudes about LGBT+ issues (Case & Stewart, 2010). Choi-Pearson, Castillo & Maples (2004) found that as "diversity training" increased for student services professionals on a college campus, their levels of prejudice in the areas of race, gender, and sexuality decreased.
35. Denson & Bowman (2017) examined the impact that diversity courses offered on college campuses had on overall student outcomes. While the impact of these courses on students varies based on a variety of factors – including instructor background, knowledge, teaching skill, as well as their disposition and attitude – the data and studies showed these courses, by and large, do not cause harm to students. The evidence does not support a claim to the contrary.
36. Research in this area also examines how certain programs, such as the Meyerhoff Scholars program at the University of Maryland-Baltimore County impact the STEM participation as well as the retention, persistence and graduation rates of students of color at those institutions (Maton, et al., 2012). There is broad consensus that campus-based DEI efforts – including courses, training and specialized programs for students of color that provide additional socio-emotional, financial, and academic support to students of color – have a strong positive impact on those students' success rates. Not only do these courses, programs, and

training activities fail to cause harm, they greatly benefit students of color who may lack other forms of support.

37. The BERT declaration offers a student group's personal account of what they have experienced at the University of Oklahoma in the wake of the passing of H.B. 1775. The multitude of racist incidents occurring on the University of Oklahoma campus – both in the classroom and in the public space – is startling and disconcerting. The declarant's observation that there are increasing concerns about safety for both racially marginalized students and women, is also of great concern. Based on the research and my experience as a Dean and faculty member, the University could have taken appropriate steps to bring greater awareness and safety to the students through the required DEI course and the mandatory sexual assault training. However, H.B. 1775 forced the University to abandon both as mandatory requirements. This will likely make the campuses less safe, welcoming, and engaging for all students but especially marginalized students.
38. I have not testified as an expert witness at trial or by deposition during the previous four years.

I am producing this declaration on a pro bono basis.

I certify under penalty of perjury that the foregoing is true and correct based upon my personal knowledge. Executed in Oregon this 28th day of October 2021.

PROFESSIONAL EXPERIENCE

Portland State University, Oregon July, 2021 to Present
Professor, College of Education – On sabbatical

Portland State University, Oregon June, 2017 to June, 2021
Dean & Professor – The College of Education

- Managed all aspects of the college including budget, faculty review, vision setting, external partnerships, public relations & fundraising
 - Developed a comprehensive 3-year strategic plan in 2019
 - Established a process for measuring the success of objectives outlined
 - Increased faculty diversity to 35% exceeding goals established
 - Increased the diversity of dean's office staff by 40%
 - Significantly increased funding for equity-focused research
 - Online Masters programs grew significantly and increased in ranking
 - Hired the inaugural Coordinator for Equity, Diversity & Inclusion
 - Hired a Director of Research who provided direct support for junior faculty to prepare for external funding opportunities
 - Enhanced partnerships with area school districts
 - Joined Carnegie Foundation's "ILEAD" partnership in connection with Portland Public Schools
 - Joined Wallace Foundation's Educational Leadership initiative in partnership with Portland Public Schools
 - Maintained an advisory board which included all area superintendents and key educational organizations to increase partnership pathways

- Fundraising
 - Raised \$8M+ to support capital construction, student scholarships, and strategic planning
 - Received \$300K+ in external grants
 - Received \$80K from the Oregon Higher Education Coordinating Commission to support the hiring of diversity professional who would support diverse students
 - Received

- *Internal Service*
 - Chair or Co-Chair
 - University Partnership Council (2019-2021)
 - Helped to lead the university's engagement agenda regularly convening faculty and staff across the university to discuss community partnerships.
 - Participated in APLU meetings and represented the university at national meetings on civic and community engagement
 - Leadership & Infrastructure Taskforce for the Office of Global Diversity & Inclusion (2020-Present)
 - Worked with leaders from across campus to develop a set of strong recommendations for ensuring that university infrastructure would support the implementation of an equity plan.
 - Social Work Dean Search Committee (2019)
 - Successfully recruited a new dean to lead the School of Social Work
 - Committee Memberships

- Provost Search Committee (2019)
 - Associate Vice President for Marketing & Communications Search Committee (2021)
 - Capital Advisory Committee (2017-Present)
 - Space Allocation Committee (2017-2021)
 - Postsecondary Transition Action Committee (2020-2021)
 - Portland Teachers Program Executive Committee, 2017-2021
- *External Service:*
 - President of the Oregon Association of Colleges for Teacher Education, 2020-2021
 - Developed the Oregon Educator Preparation Consortium to bring faculty together with state leaders to discuss
 - Director, Oregon Educator Advancement Council (2018-Present)
 - Board of Directors, American Association of Colleges for Teacher Education (2020-Present)
 - Elected as Secretary to the Board, term beginning 2022
 - Executive Committee Member, Council of Academic Deans from Research Education Institutions (Elected 2021)
 - Term ended June 30, 2021
 - Board of Directors, Carnegie Project for the Education Doctorate (2019 – Present)
 - Education Recovery Committee, Governor’s Racial Justice Council (2020-Present)
 - AERA Division K Early Career Award Selection Committee (2021)
 - Oregon Community Ministry Board, Providence Health & Services
 - Co-Chair of the Equity Sub-committee
 - Member, Oregon Educator Advisory Group (2017-Present)

Indiana University – South Bend, Indiana 2013 to 2017
Dean & Professor – The School of Education

- Managed all aspects of the School of Education
 - Stabilized enrollment
 - Crystallized partnerships with community agencies including 100 Black Men, the Boys & Girls Club
 - Partnered with the University of Notre Dame
 - Served on a statewide committee to determine whether the IU Bloomington and IU Indianapolis School of Education should separate
 - Led a consortium of IU Deans to determine best approaches to collaborating across schools and college
 - Began a successful initiative to recruit Black males into the teaching profession
 - Began a student union that gave students opportunities to work directly with the dean’s office to resolve concerns and issues

University of Wisconsin – Eau Claire 2011 to 2013

Associate Dean & Associate Professor – The College of Education & Human Sciences

- Managed assessment and accreditation for all licensure programs

University of Illinois at Chicago

2007 to 2011

Associate Professor, College of Education

- Managed the graduate and undergraduate elementary education programs
- Taught courses in Black Education, Social Studies Education and Multicultural Education

University of Maryland, College Park

2001 to 2007

Assistant Professor, The College of Education

- Developed, and coordinated the Minority & Urban Education graduate program
- Taught courses in Urban Education, Elementary Education, Multicultural Education, and the Politics of Education.
- Awarded tenure in 2007.
