Approved for Release: 2016/09/30 C05856717

Approved for Release: 2016/09/30 C05856717 (b)(1) TOP SECRET (b)(3) NatSecAct OFFICE OF INSPECTOR GENERAL SPECIAL REVIEW (b)(1)(b)(3) NatSecAct COUNTERTERRORISM DETENTION AND INTERROGATION ACTIVITIES (SEPTEMBER 2001 - OCTOBER 2003) (2003-7123-IG) 7 May 2004 (b)(1)(b)(3) NatSecAct INTRODUCTION On 17 September 2001, the President signed a Memorandum of Notification (MON) (b)(1)(b)(3) NatSecAct One of the key weapons in the war on terror was the MON authorization for CIA to "undertake operations designed to capture and detain persons who pose a continuing, serious threat of violence or death to U.S. persons and interests or who are planning terrorist activities." (b)(1)(b)(3) NatSecAct 2. (<del>TS</del>) In November 2002, the Deputy Director for Operations (DDO) informed the Office of Inspector General (OIG) that the Agency had established a program in the Counterterrorist Center to detain and interrogate terrorists at sites abroad ("the CTC Program"). He also informed OIG that he had just learned of and had dispatched a team to investigate the death of a detainee, Gul (b)(1)Rahman In January 2003, the DDO informed OIG (b)(3) NatSecAct that he had received allegations that Agency personnel had used unauthorized interrogation techniques with a detainee, 'Abd Al-Rahim Al-Nashiri, at another foreign site, and requested that (b)(1)ידט פיבר סידי D0011 (b)(3) NatSecAct Approved for Release: 2016/09/30 C05856717

	TOP SECRET (b)(1) (b)(3) NatSecAct
(b)(1)	in March 2002, presented the Agency with a significant dilemma. <sup>4</sup> The Agency was under pressure to do everything possible to prevent additional terrorist attacks. Senior Agency officials believed Abu Zubaydah was withholding information that could not be obtained through then-authorized interrogation techniques. Agency officials believed that a more robust approach was necessary to elicit threat information from Abu Zubaydah and possibly from other senior Al-Qa'ida high value detainees.
(b)(3) NatSe	5. (TS/ The conduct of detention and interrogation activities presented new challenges for CIA. These included determining where detention and interrogation facilities could be securely located and operated, and identifying and preparing qualified personnel to manage and carry out detention and interrogation activities. With the knowledge that Al-Qa'ida
) .	personnel had been trained in the use of resistance techniques, another challenge was to identify interrogation techniques that Agency personnel could lawfully use to overcome the resistance. In this context, CTC, with the assistance of the Office of Technical Service (OTS), proposed certain more coercive physical techniques to use on Abu Zubaydah. All of these considerations took place against
(b)(1) (b)(3) NatSe	the backdrop of pre-September 11, 2001 CIA avoidance of interrogations and repeated U.S. policy statements condemning torture and advocating the humane treatment of political prisoners and detainees in the international community.  CACT
b)(1) b)(3) NatSe	6. (TS/ The Office of General Counsel (OGC) took the lead in determining and documenting the legal parameters and constraints for interrogations. OGC conducted independent research
	The use of "high value" or "medium value" to describe terrorist targets and detainees in this Review is based on how they have been generally categorized by CTC. CTC distinguishes targets according to the quality of the intelligence that they are believed likely to be able to provide about current terrorist threats against the United States. Senior Al-Qa'ida planners and operators, such as Abu Zubaydah and Khalid Shaykh Muhammad, fall into the category of "high value" and are given the highest priority for capture, detention, and interrogation. CTC categorizes those individuals who are believed to have lesser direct.

3 (b)(1) (b)(3) NatSecAct Approved for Release: 2016/09/30 C05856717

knowledge of such threats, but to have information of intelligence value, as "medium value"

targets/detainees.

(b)(3) NatSecAct  10. (TS)  There were few instances of deviations	
10. There were few instances of deviations	
nont approved procedures with one	
notable exception described in this Review. With respect to two	
( $\nu_{J}(3)$ NatSecAct detainees at those sites, the use and frequency of one EIT, the	
waterboard, went beyond the projected use of the technique as	
o iginally desc ibed to DoJ. The Agency, on 29 July 2003, secured	
oral DoJ concurrence that certain deviations are not significant for	
(b)(1) purposes of DoJ's legal opinions. (b)(1) (b)(3) NatSecAct	
(b)(3) NatSecAct	
11. (TS/) By contrast, the Agency's conduct of	
(b)(1) detention and interrogation activities in	
(b)(3) NatSecAct in particular, raises a nost of issues. The first Site Manager at	
was a first-tour officer who had no experience or	•
training to run a detention facility. He had not received interrogations training and ran the facility with scant guidance from	
Headquarters Station (b)(1)	
(b)(6) readquarters Station. (b)(3) NatSecAct (b)(7)(c)	
12. (TS/ presents a number of specific	
concerns.	
Agency staff and	
independent contractors (b)(1) then go to the facility to	<u></u>

	conduct interrogations, but there is little continuity except for the Site	
	Manager. (b)(1) has responsibility for the	
(b)(1)	identy.	 ค
(b)(3) NatSec	13. (TS/ During the period covered by this	
(b)(1)	Review, did not uniformly document or report the	71
(b)(3) NatSe	ecActatment of detainees, their conditions, or medical care provided.  Because of the lack of guidance, limited personnel resources, and	i. J
(h)/4)	limited oversight, there were instances of improvisation and other	1
(b)(1) (b)(3) NatSe	cActidocumented interrogation techniques In November	الأو .
	2002, one individual—Gul Rahman—died as a result of the way he	
(b)(1)	was detained there.	\$. <b></b>
(b)(3) NatSe	14. (TS/ There is no indication that the CTC	
·	Program has been inadequately funded. Across the board, however,	rn.
İ	staffing has been and continues to be the most difficult resource challenge for the Agency. This is largely attributable to the lack of	.,
	personnel with interrogations experience or requisite language skills	
,)	and the heavy personnel demands for other counterterrorism	.1
(b)(1) (b)(3) NatSe	assignments.	ं
(p)(3) Marge	15. (FS/ Agency efforts to provide systematic,	
	clear and timely guidance to those involved in the CTC Detention	
	and Interrogation Program was inadequate at first but have	• •
	improved considerably during the life of the Program as problems have been identified and addressed. CTC implemented training	
•	programs for interrogators and debriefers. 6 Moreover, building upon	2
(b)(1) (b)(3) NatSe	operational and legal guidance previously sent to the field, the DCI	
(D)(S) NaiSe		14
	6 (TS/ Before 11 September (9/11) 2001, Agency personnel sometimes used the terms interrogation/interrogator and debriefing/debriefer interchangeably. The use of these terms has	<u> </u>
	since evolved and, today, CTC more clearly distinguishes their meanings. A debriefer engages a detainee solely through question and answer. An interrogator is a person who completes a	1.4
	two-week interrogations training program, which is designed to train, qualify, and certify a	فنن
	person to administer EITs. An interrogator can administer EITs during an interrogation of a detainee only after the field, in coordination with Headquarters, assesses the detainee as	· •
	withholding information. An interrogator transitions the detainee from a non-cooperative to a cooperative phase in order that a debriefer can elicit actionable intelligence through	ā
	non-aggressive techniques during debriefing sessions. An interrogator may debrief a detainee during an interrogation; however, a debriefer may not interrogate a detainee.	· · · · · · · · · · · · · · · · · · ·

	Approved for Release: 2016/09/30 C05856717	

Approved for Release: 2016/09/30 C05856717

	TOP SECRET/ (b)(1)
	(b)(3) NatSecAct
	on 28 January 2003 signed "Guidelines on Confinement Conditions
:	for CIA Detainees" and "Guidelines on Interrogations Conducted
	Pursuant to the Presidential Memorandum of Notification of
	17 September 2001." The DCI Guidelines require individuals
	engaged in or supporting interrogations pursuant to programs
	implementing the MON of September 2001 be made aware of the
	guidelines and sign an acknowledgment that they have read them.
	The DCI Interrogation Guidelines make formal the existing CTC
	practice of requiring the field to obtain specific Headquarters
	approvals prior to the application of all EITs. Although the DCI
	Guidelines are an improvement over the absence of such DCI
	Guidelines in the past, they still leave substantial room for
•	misinterpretation and do not cover all Agency detention and
	interrogation activities.
NatSec/	Act .
	16. (TS The Agency's detention and interrogation
	of terrorists has provided intelligence that has enabled the
	identification and apprehension of other terrorists and warned of
	terrorist plots planned for the United States and around the world.
	The CTC Program has resulted in the issuance of thousands of
	individual intelligence reports and analytic products supporting the
	counterterrorism efforts of U.S. policymakers and military
	commanders.
) \	
) NatSe	17. (FS) The current CTC Detention and
	Interrogation Program has been subject to DoJ legal review and
	Administration approval but diverges sharply from previous Agency
	policy and rules that govern interrogations by U.S. military and law
	enforcement officers. Officers are concerned that public revelation of
	the CTC Program will seriously damage Agency officers' personal
	reputations, as well as the reputation and effectiveness of the Agency
	itself.
NatSec	
	18. (TS/ recognized that detainees may
	be held in U.S. Government custody indefinitely if appropriate law
	enforcement jurisdiction is not asserted. Although there has been
	ongoing discussion of the issue inside the Agency and among NSC,

	the General
	Counsel should seek an updated legal opinion from DoJ revalidating and modifying, consistent with actual practice, the legal authority for
	the continued application of EITs. If such approval is not forthcoming, the DCI should direct that EITs be implemented only within the parameters of the existing written DoJ authorization. The
	DCI should brief the President on the use of EITs and the fact that detainees have died.
	(b)(5)

#### **BACKGROUND**

22. (5) The Agency has had intermittent involvement in the interrogation of individuals whose interests are opposed to those of the United States. After the Vietnam War, Agency personnel experienced in the field of interrogations left the Agency or moved to other assignments. In the early 1980s, a resurgence of interest in teaching interrogation techniques developed as one of several methods to foster foreign liaison relationships. Because of political sensitivities the then-Deputy Director of Central Intelligence (DDCI) forbade Agency officers from using the word "interrogation." The Agency then developed the Human Resource Exploitation (HRE) training program designed to train foreign liaison services on interrogation techniques.

23. (S) In 1984, OIG investigated allegations of misconduct on the part of two Agency officers who were involved in interrogations

(b)(1)
(b)(3) NatSecAct the death of one individual

Following that investigation, the Agency took steps to ensure Agency personnel understood its policy on

	DISCUSSION
	GENESIS OF POST 9/11 AGENCY DETENTION AND INTERROGATION ACTIVITIES
)(1) )(3)	Act 25. (FS/ The statutory basis for CIA's involvement
:	in detentions and interrogations is the DCI's covert action responsibilities under the National Security Act of 1947, as amended.7
	Under the Act, a covert action must be based on a Presidential  "finding that the action is necessary to support identifiable foreign  policy objectives and is important to the national security."  Covert
1	action findings must be in writing and "may not authorize any action that would violate the Constitution or any statute of the United
!	States."9 These findings are implemented through Memoranda of Notification.
o)(1) o)(3)	cAct 26. (FS/ (b)(1) The 17 September 2001 MON authorizes
	the DCI, acting through CIA, to undertake operations "designed to capture and detain persons who pose a continuing, serious threat of violence or death to U.S. persons and interests or who are planning
	terrorist activities." Although the MON does not specifically mention interrogations of those detained, this aspect of the CTC Program can be justified as part of CIA's general authority and responsibility to collect intelligence. <sup>10</sup>
	27. (S//NF) The DCI delegated responsibility for implementation of the MON to the DDO and D/CTC. Over time,
	CTC also solicited assistance from other Agency components, including OGC, OMS, OS, and OTS.
	<sup>7</sup> (U// <del>POUO</del> ) DoJ takes the position that as Commander-in-Chief, the President independently has the Article II constitutional authority to order the detention and interrogation of enemy combatants to gain intelligence information.  8 (U// <del>FOUO</del> ) 50 U.S.C. 413b(a).
	9 (U// <del>POUO</del> ) 50 U.S.C. 413b(a)(1), (5). 10 (U// <del>POUO</del> ) 50 U.S.C. 403-1, 403-3(d)(1).

#### **Enhanced Interrogation Techniques**

- The attention grasp consists of grasping the detainee with both hands, with one hand on each side of the collar opening, in a controlled and quick motion. In the same motion as the grasp, the detainee is drawn toward the interrogator.
- During the walling technique, the detainee is pulled forward and then quickly and firmly pushed into a flexible false wall so that his shoulder blades hit the wall. His head and neck are supported with a rolled towel to prevent whiplash.
- The facial hold is used to hold the detainee's head immobile. The interrogator places an open palm on either side of the detainee's face and the interrogator's fingertips are kept well away from the detainee's eyes.
- With the facial or insult slap, the fingers are slightly spread apart. The
  interrogator's hand makes contact with the area between the tip of the detainee's
  chin and the bottom of the corresponding earlobe.
- In cramped confinement, the detainee is placed in a confined space, typically a small or large box, which is usually dark. Confinement in the smaller space lasts no more than two hours and in the larger space it can last up to 18 hours.
- Insects placed in a confinement box involve placing a harmless insect in the box with the detainee.
- During wall standing, the detainee may stand about 4 to 5 feet from a wall with his feet spread approximately to his shoulder width. His arms are stretched out in front of him and his fingers rest on the wall to support all of his body weight. The detainee is not allowed to reposition his hands or feet.
- The application of stress positions may include having the detainee sit on the floor with his legs extended straight out in front of him with his arms raised above his head or kneeling on the floor while leaning back at a 45 degree angle.
- Sleep deprivation will not exceed 11 days at a time.
- The application of the waterboard technique involves binding the detainee to a bench with his feet elevated above his head. The detainee's head is immobilized and an interrogator places a cloth over the detainee's mouth and nose while pouring water onto the cloth in a controlled manner. Airflow is restricted for 20 to 40 seconds and the technique produces the sensation of drowning and suffocation.

38. (U//FOUO) The Torture Convention applies to the United States only in accordance with the reservations and understandings made by the United States at the time of ratification. As explained to the Senate by the Executive Branch prior to ratification:

Article 16 is arguably broader than existing U.S. law. The phrase "cruel, inhuman or degrading treatment or punishment" is a standard formula in international instruments and is found in the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the European Convention on Human Rights. To the extent the phrase has been interpreted in the context of those agreements, "cruel" and "inhuman" treatment or punishment appears to be roughly equivalent to the treatment or punishment barred in the United States by the Fifth, Eighth and Fourteenth Amendments. "Degrading" treatment or punishment, however, has been interpreted as potentially including treatment that would probably not be prohibited by the U.S. Constitution. [Citing a ruling that German refusal to recognize individual's gender change might be considered "degrading" treatment.] To make clear that the <u>United States construes the phrase to be</u> coextensive with its constitutional guarantees against cruel, unusual, and inhumane treatment, the following understanding is recommended:

"The United States understands the term 'cruel, inhuman or degrading treatment or punishment,' as used in Article 16 of the Convention, to mean the cruel, unusual, and inhumane treatment or punishment prohibited by the Fifth, Eighth and/or Fourteenth Amendments to the Constitution of the United States." [Emphasis added.]

•	(h)/3	) NatSecAct	
	L(D)(J	) 14dtOCO/10t	

39. (U//FOUO) In accordance with the Convention, the United States criminalized acts of torture in 18 U.S.C. 2340A(a), which provides as follows:

Whoever outside the United States commits or attempts to commit torture shall be fined under this title or imprisoned not more than 20 years, or both, and if death results to any person from conduct prohibited by this subsection, shall be punished by death or imprisoned for any term of years or for life.

The statute adopts the Convention definition of "torture" as "an act committed by a person acting under the color of law specifically intended to inflict severe physical or mental pain or suffering (other than pain or suffering incidental to lawful sanctions) upon another person within his custody or physical control." Severe physical pain and suffering is not further defined, but Congress added a definition of "severe mental pain or suffering:"

[T]he prolonged mental harm caused by or resulting from-

- (A) the intentional infliction or threatened infliction of severe physical pain or suffering;
- (B) the administration or application, or threatened administration or application, of mind-altering substances or other procedures calculated to disrupt profoundly the senses or the personality;
- (C) the threat of imminent death; or
- (D) the threat that another person will imminently be subjected to death, severe physical pain or suffering, or the administration or application of mind-altering substances or other procedures calculated to disrupt profoundly the senses or personality....<sup>19</sup>

These statutory definitions are consistent with the understandings and reservations of the United States to the Torture Convention.

18 (U//<del>FOUO</del>) 18 U.S.C. 2340(1). 19 (U//<del>FOUO</del>) 18 U.S.C. 2340(2).

40. (U//FOUQ) DoJ has never prosecuted a violation of the torture statute, 18 U.S.C. §2340, and there is no case law construing its provisions. OGC presented the results of its research into relevant issues under U.S. and international law to DoJ's OLC in the summer of 2002 and received a preliminary summary of the elements of the torture statute from OLC in July 2002. An unclassified 1 August 2002 OLC legal memorandum set out OLC's conclusions regarding the proper interpretation of the torture statute and concluded that "Section 2340A proscribes acts inflicting, and that are specifically intended to inflict, severe pain or suffering whether mental or physical." Also, OLC stated that the acts must be of an "extreme nature" and that "certain acts may be cruel, inhuman, or degrading, but still not produce pain and suffering of the requisite intensity to fall within Section 2340A's proscription against torture." Further describing the requisite level of intended pain, OLC stated:

Physical pain amounting to torture must be equivalent in intensity to the pain accompanying serious physical injury, such as organ failure, impairment of bodily function, or even death. For purely mental pain or suffering to amount to torture under Section 2340, it must result in significant psychological harm of significant duration, e.g., lasting for months or even years.<sup>21</sup>

OLC determined that a violation of Section 2340 requires that the infliction of severe pain be the defendant's "precise objective." OLC also concluded that necessity or self-defense might justify interrogation methods that would otherwise violate Section 2340A.<sup>22</sup> The August 2002 OLC opinion did not address whether any other provisions of U.S. law are relevant to the detention, treatment, and interrogation of detainees outside the United States.<sup>23</sup>

<sup>&</sup>lt;sup>20</sup> (U//<del>FOUO</del>) Legal Memorandum, Re: Standards of Conduct for Interrogation under 18 U.S.C. 2340-2340A (1 August 2002).

<sup>21 (</sup>U//FOUO) Ibid., p. 1.

<sup>22 (</sup>U//POUO) Ibid., p. 39.

<sup>23 (</sup>U//FOUQ) OLC's analysis of the torture statute was guided in part by judicial decisions under the Torture Victims Protection Act (TVPA) 28 U.S.C. 1350, which provides a tort remedy for victims of torture. OLC noted that the courts in this context have looked at the entire course

	41 (YY / (TOYTO) A 1 1 1 1 1 1 1 1 A 1 1 2000 OY O	
	41. (U// <del>FOUO)</del> A second unclassified 1 August 2002 OLC opinion addressed the international law aspects of such	
	interrogations. <sup>24</sup> This opinion concluded that interrogation methods	
	that do not violate 18 U.S.C. 2340 would not violate the Torture	<b>3.3</b>
	Convention and would not come within the jurisdiction of the	
(b)(1)	International Criminal Court.	ป
(b)(3) NatSe	42. (FS/ In addition to the two unclassified	**
•	opinions, OLC produced another legal opinion on 1 August 2002 at	ij
	the request of CIA. <sup>25</sup> (Appendix C.) This opinion, addressed to	
	CIA's Acting General Counsel, discussed whether the proposed use	
	of EITs in interrogating Abu Zubaydah would violate the Title 18	
	prohibition on torture. The opinion concluded that use of EITs on	
	Abu Zubaydah would not violate the torture statute because, among	
	other things, Agency personnel: (1) would not specifically intend to	
•	inflict severe pain or suffering, and (2) would not in fact inflict severe	(1
(1)	pain or suffering.	3
(b)(3) NatSe	ecAct	l.
( )( ) /	43. (15) Itus OLC opinion was based upon	
,	specific representations by CIA concerning the manner in which EITs	4
•	would be applied in the interrogation of Abu Zubaydah. For	· 1
	example, OLC was told that the EIT "phase" would likely last "no more than several days but could last up to thirty days." The EITs	
	would be used on "an as-needed basis" and all would not necessarily	F?
,	be used. Further, the EITs were expected to be used "in some sort of	
,	escalating fashion, culminating with the waterboard though not	53
	necessarily ending with this technique." Although some of the EITs	
•		33
		1
	of conduct, although a single incident could constitute torture. OLC also noted that courts may	17
	be willing to find a wide range of physical pain can rise to the level of "severe pain and suffering." Ultimately, however, OLC concluded that the cases show that only acts "of an	
	extreme nature have been redressed under the TVPA's civil remedy for torture." White House	ı.a

might be used more than once, "that repetition will not be substantial because the techniques generally lose their effectiveness after several repetitions." With respect to the waterboard, it was explained that:

... the individual is bound securely to an inclined bench .... The individual's feet are generally elevated. A cloth is placed over the forehead and eyes. Water is then applied to the cloth in a controlled manner. As this is done, the cloth is lowered until it covers both the nose and mouth. Once the cloth is saturated and completely covers the mouth and nose, the air flow is slightly restricted for 20 to 40 seconds due to the presence of the cloth. This causes an increase in carbon dioxide level in the individual's blood. This increase in the carbon dioxide level stimulates increased effort to breathe. This effort plus the cloth produces the perception of "suffocation and incipient panic," i.e., the perception of drowning. The individual does not breathe water into his lungs. During those 20 to 40 seconds, water is continuously applied from a height of [12] to 24] inches. After this period, the cloth is lifted, and the individual is allowed to breathe unimpeded for three or four full breaths. The sensation of drowning is immediately relieved by the removal of the cloth. The procedure may then be repeated. The water is usually applied from a canteen cup or small watering can with a spout. . . . [T]his procedure triggers an automatic physiological sensation of drowning that the individual cannot control even though he may be aware that he is in fact not drowning. [1]t is likely that this procedure would not last more than 20 minutes in any one application.

Finally, the Agency presented OLC with a psychological profile of Abu Zubaydah and with the conclusions of officials and psychologists associated with the SERE program that the use of EITs would cause no long term mental harm. OLC relied on these representations to support its conclusion that no physical harm or prolonged mental harm would result from the use on him of the EITs, including the waterboard.<sup>26</sup>

(b)(1) ] (b)(3) NatSecAct

According to the Chief, Medical Services, OMS was neither consulted nor involved in the initial analysis of the risk and benefits of EITs, nor provided with the OTS report cited in the OLC opinion. In retrospect, based on the OLC extracts of the OTS report, OMS contends that the reported sophistication of the preliminary EIT review was exaggerated, at least as it related to the waterboard, and that the power of this EIT was appreciably overstated in the report. Furthermore, OMS contends that the expertise of the SERE psychologist/interrogators on

	TOP SECRET (b)(1)	۶٦ : : :

## **DCI Interrogation Guidelines**

60. (S//NF) Prior to January 2003, CTC and OGC disseminated guidance via cables, e-mail, or orally on a case-by-case basis to address requests to use specific interrogation techniques. Agency management did not require those involved in interrogations to sign an acknowledgement that they had read, understood, or agreed to comply with the guidance provided. Nor did the Agency maintain a comprehensive record of individuals who had been briefed on interrogation procedures.

61. (TS)
(b)(1)
(b)(3) NatSecAct

The DCI

Interrogation Guidelines require that all personnel directly engaged in the interrogation of persons detained have reviewed these Guidelines, received appropriate training in their implementation, and have completed the applicable acknowledgement.

62. (S//NF) The DCI Interrogation Guidelines define "Permissible Interrogation Techniques" and specify that "unless otherwise approved by Headquarters, CIA officers and other personnel acting on behalf of CIA may use only Permissible Interrogation Techniques. Permissible Interrogation Techniques consist of both (a) Standard Techniques and (b) Enhanced

	(b)(3)

address the use of props to imply a physical threat to a detainee, nor did it specifically address the issue of whether or not Agency officers could improvise with any other techniques. No formal mechanisms were in place to ensure that personnel going to the field were briefed on the existing legal and policy guidance.

(b)(3) NatSecA	Specific Unauthorized or Undocumented Techniques
	90. (TS/ This Review heard allegations of the use
	of unauthorized techniques The most significant, the
	handgun and power drill incident, discussed below, is the subject of a
	separate OIG investigation. In addition, individuals interviewed
	during the Review identified other techniques that caused concern
	because DoJ had not specifically approved them. These included the
	making of threats, blowing cigar smoke, employing certain stress
	positions, the use of a stiff brush on a detainee, and stepping on a
•	detainee's ankle shackles. For all of the instances, the allegations
•	were disputed or too ambiguous to reach any authoritative
./	determination regarding the facts. Thus, although these allegations
	are illustrative of the nature of the concerns held by individuals
	associated with the CTC Program and the need for clear guidance,
	they did not warrant separate investigations or administrative action.

General acknowledged he is fully aware of the repetitive use of the waterboard and that CIA is well within the scope of the DoJ opinion and the authority given to CIA by that opinion. The Attorney General was informed the waterboard had been used 119 times on a single individual.

(b)(3) NatSecAct

(b)(1)

100. (<del>TS</del>) Cables indicate that Agency interrogators applied the waterboard technique to Khalid Shaykh Muhammad 183 times during 15 sessions over a period of 14 days. The application of this technique to Khalid Shaykh Muhammad evolved because of this detainee's ability to counter the technique by moving his lips to the side to breathe while water was being poured. To compensate, the interrogator administering the waterboard technique reportedly held Khalid Shaykh Muhammad's lips with one hand while pouring water with the other. Khalid Shaykh Muhammad also countered the technique by holding his breath and drinking as much of the water being administered as he could. An on-site physician monitoring the waterboard sessions estimated that Khalid Shaykh Muhammad was capable of ingesting up to two liters of water. Cables indicate that an average of 19 liters (5 gallons) of water were used per waterboard session, with some of the water being splashed onto Khalid Shaykh Muhammad's chest and abdomen to evoke a visceral response from him. On the advice of the presiding physician, water was replaced with normal saline to prevent water intoxication and dilution of electrolytes. In addition, one of the interrogators reportedly formed his hands over Khalid Shaykh Muhammad's mouth to collect approximately one inch of standing water.<sup>47</sup> Cables reflect that, during six waterboard

(b)(1) (b)(3) NatSecA	Manager and planned to author procedures, before he could do so, he was sent to for the interrogation of a high value detainee.	
	to shave each detainee's head and beard and conduct a medical examination upon arrival. Detainees were then given uniforms and moved to a cell. All detainees were subjected to total darkness and loud music. Photographs were taken of each detainee for identification purposes. While in the cells, detainees were shackled to the wall. The guards fed the detainees on an alternating schedule of one meal on one day and two meals the next day. As the temperature decreased in November and December 2002, the Site Manager made efforts to acquire additional supplies, such as warmer uniforms, blankets, and heaters. <sup>52</sup> If a detainee was cooperative, he was afforded improvements in his environment to include a mat, blankets, a Koran, a lamp, and additional food choices. Detainees who were not cooperative were subjected to austere conditions and aggressive interrogations until they became "compliant."	· · · · · · · · · · · · · · · · · · ·
ì	51 (S//NE) The facts and circumstances of Gul Rahman's death are discussed later in this Review.  52 (U) In November 2002, the temperature ranged from a high of 70 to a low of 31 degrees	-
